## PROJECTS

### Base Converter | [Link](#)

*Python, Flask, HTML, CSS, Javascript*

A base converter project is designed to convert numbers between different numeral systems, such as binary (base 2), decimal (base 10), hexadecimal (base 16), and others. This tool can be useful for students, programmers, and anyone needing to work with different numeral bases.

### Customer Churn Prediction | [Link](#)

*Python, Pandas, Matplotlib, Machine learning Algorithms*

This project uses machine learning to predict customer churn, helping businesses identify which customers are likely to leave. By analyzing customer data, we can build models that forecast churn. This allows businesses to take proactive measures to retain customers and improve overall satisfaction.
